

RASHMITHA B RAMESH

Kakkunje, Udupi | +91 6361837986
rashmithab31082003@gmail.com | github.com/RashmithaBRamesh

PROFESSIONAL SUMMARY

Aspiring AI/ML and Data Analytics engineer with hands-on experience in Python, SQL, Deep Learning, NLP and Data Visualization. Skilled in building ML models and data-driven applications using TensorFlow, PyTorch, Pandas, NumPy, Databricks and Power BI.

EDUCATION

Manipal Institute of Information Science ME in CSE (Big Data Analytics) SGPA: 8.72	2025– Pursuing
Shri Madhwa Vadiraja Institute of Technology and Management BE in Computer Science & Engineering CGPA: 9.16	2021– 2025
Vidyodaya PU College Percentage: 90%	2019– 2021

PROJECT

Healthcare Data Engineering Pipeline using Databricks & PySpark

- Built an end-to-end ETL pipeline in Databricks using PySpark to ingest, clean and transform healthcare appointment data, enabling analysis of equipment utilization and booking trends.
- Designed and stored processed data in Delta Lake and performed SQL-based analytics to generate insights such as revenue tracking and daily booking patterns.

Interpretation of Data Visualization

- Performed exploratory data analysis (EDA) using Python libraries including Pandas, NumPy and Matplotlib to identify patterns, correlations and trends in complex datasets.
- Extracted actionable insights through statistical analysis and data visualization, enabling data-driven decision-making and deeper understanding of underlying relationships.

OPTI-HEALTH: Clear Vision, Better Health

- Developed a deep learning based image classification system using CNN for detecting cataract, conjunctivitis and Parkinson's disease from medical images.
- Built a Django web app for real-time prediction and patient history tracking.

INTERNSHIP

Centre for Software Development (CSD) Developed and deployed a hospice management module for the Oncology Department at Manipal Academy of Higher Education using a 3-tier architecture, ensuring structured data flow and system scalability. Built frontend and backend functionalities in a .NET environment, improving operational efficiency and enabling smooth management of patient data and workflows.	Mar 2025 – Jun 2025
--	---------------------

Golden Bird Education Internship Completed a 3-month Software Development internship at Goldenbird Education, leveraging Python, Data Science and AI (including LLMs) to develop real-world solutions. Applied machine learning and data analysis techniques to solve practical problems, enhancing system functionality and analytical performance.	Nov 2024 – Mar 2025
---	---------------------

SKILLS

- Programming Languages: C, Python, SQL
- Software Development: .NET, Django, React.js, HTML, CSS
- Data Engineering & Analytics: ETL Pipelines, Data Analysis, Databricks, PySpark, Power BI
- Machine Learning & AI: Pandas, NumPy, Scikit-learn, CNN
- Tools/Environment: Git, CI/CD
- Databases: MySQL, MongoDB
- Basic understanding of LLMs, RAG pipelines, LangChain
- Familiar with Vector Databases and Generative AI workflows

CERTIFICATION

International Student Symposium, Generative AI with Large Language Models
